PACKAGING TECHNOLOGY

Flexible Case Provision

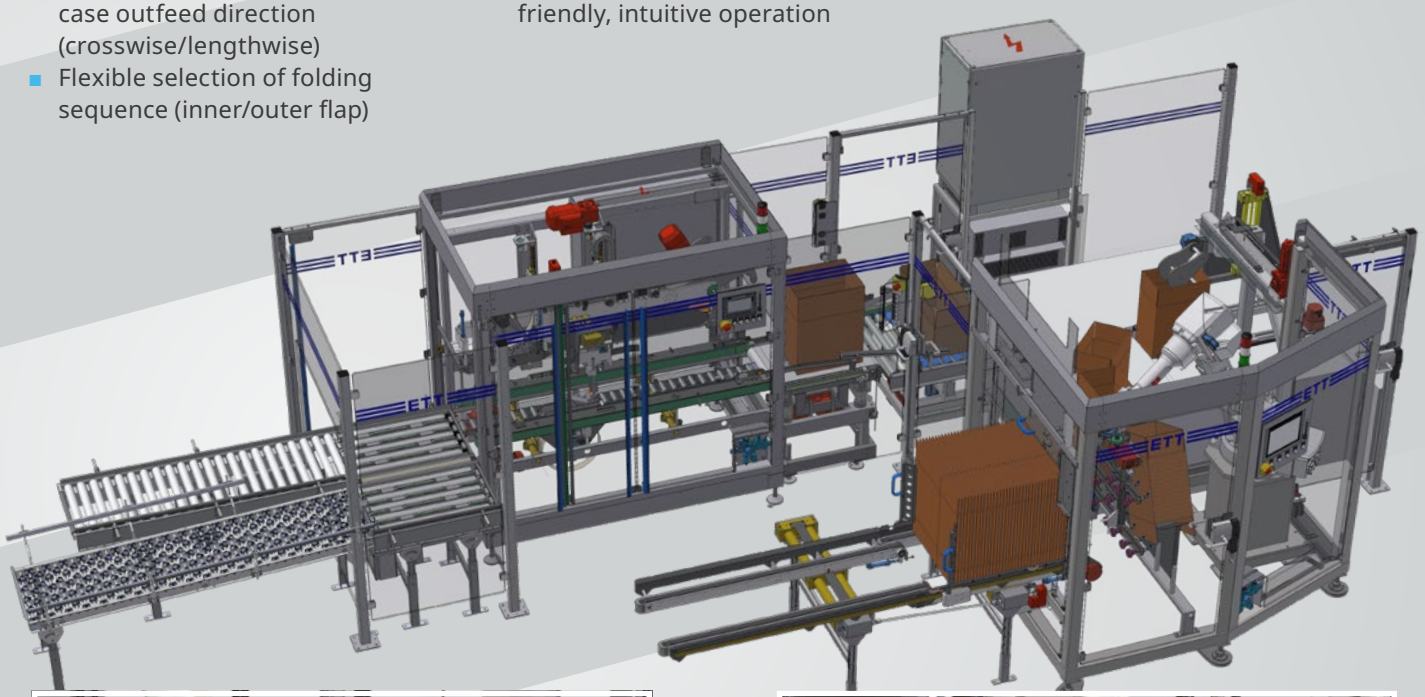
Be automatically flexible with ETT

After entering the case dimensions (LxWxH) and the case type, this case provisioning solution from ETT automatically adjusts to changing requirements and transfers the perfectly erected cases to a downstream case filling machine. The case outfeed direction as well as the bottom flap folding sequence can be flexibly selected and thus completely adapted to your requirements.

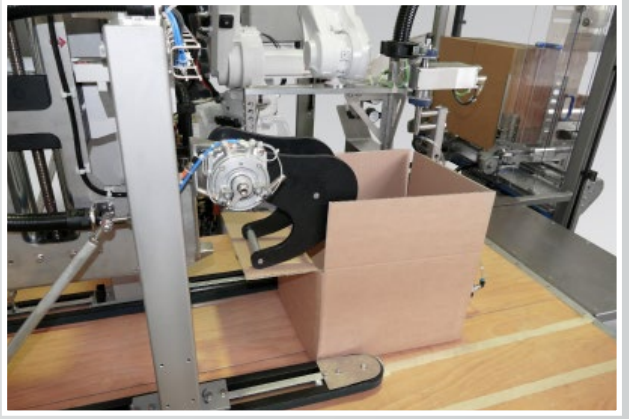
This case erector from ETT Verpackungstechnik is characterised by a good performance on a small footprint and it is the ideal complement to a folding box filling line!

HIGHLIGHTS

- Up to 10 cases/min.
- Fully automatic format changeover
- Long, adjustable case magazine
- Flexible selection of the case outfeed direction (crosswise/lengthwise)
- Flexible selection of folding sequence (inner/outer flap)
- Small footprint
- Connection to downstream case filling machine
- Universal format range by entering the case dimensions
- Touchscreen control for user-friendly, intuitive operation
- Digitisation of operating data with optional connection to higher-level control system
- Optional: case closer with self-adhesive tape for top and bottom closure



Magazine unloading & folding station



Running and folding directions can be changed as desired
