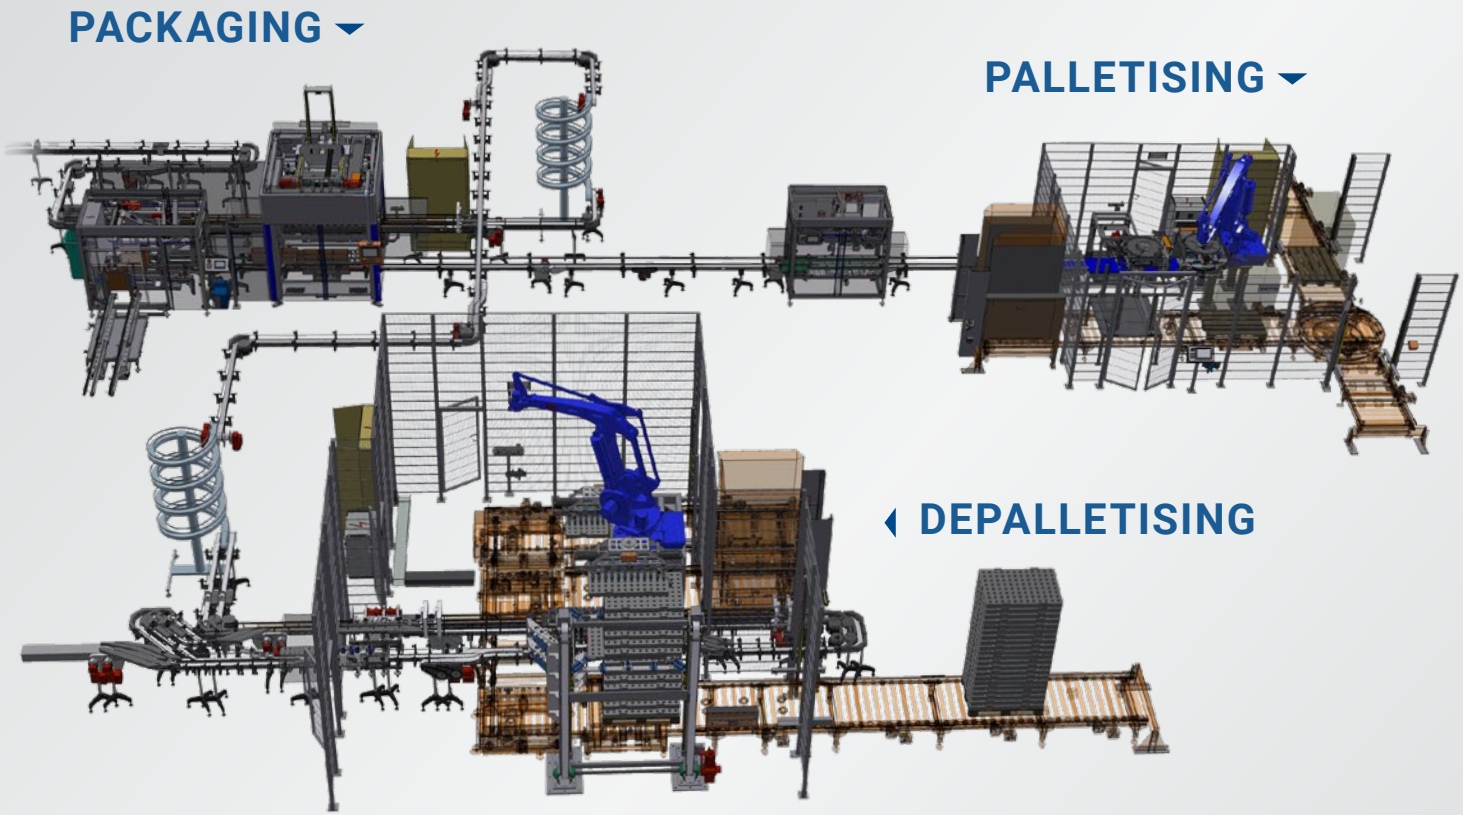
THE WHOLE WORLD OF END-OF-LINE PACKAGING

Everything from one source

OVERVIEW OF END-OF-LINE PACKAGING

OVERVIEW OF END-OF-LINE PACKAGING



Packing, repositioning, commissioning, palletising and depalletising – ETT modules enable you to realise packaging tasks flexibly and economically.

INDUSTRIES

- Pharmaceuticals
- Personal Care
- Detergents
- Chemicals
- Food
- Beverages

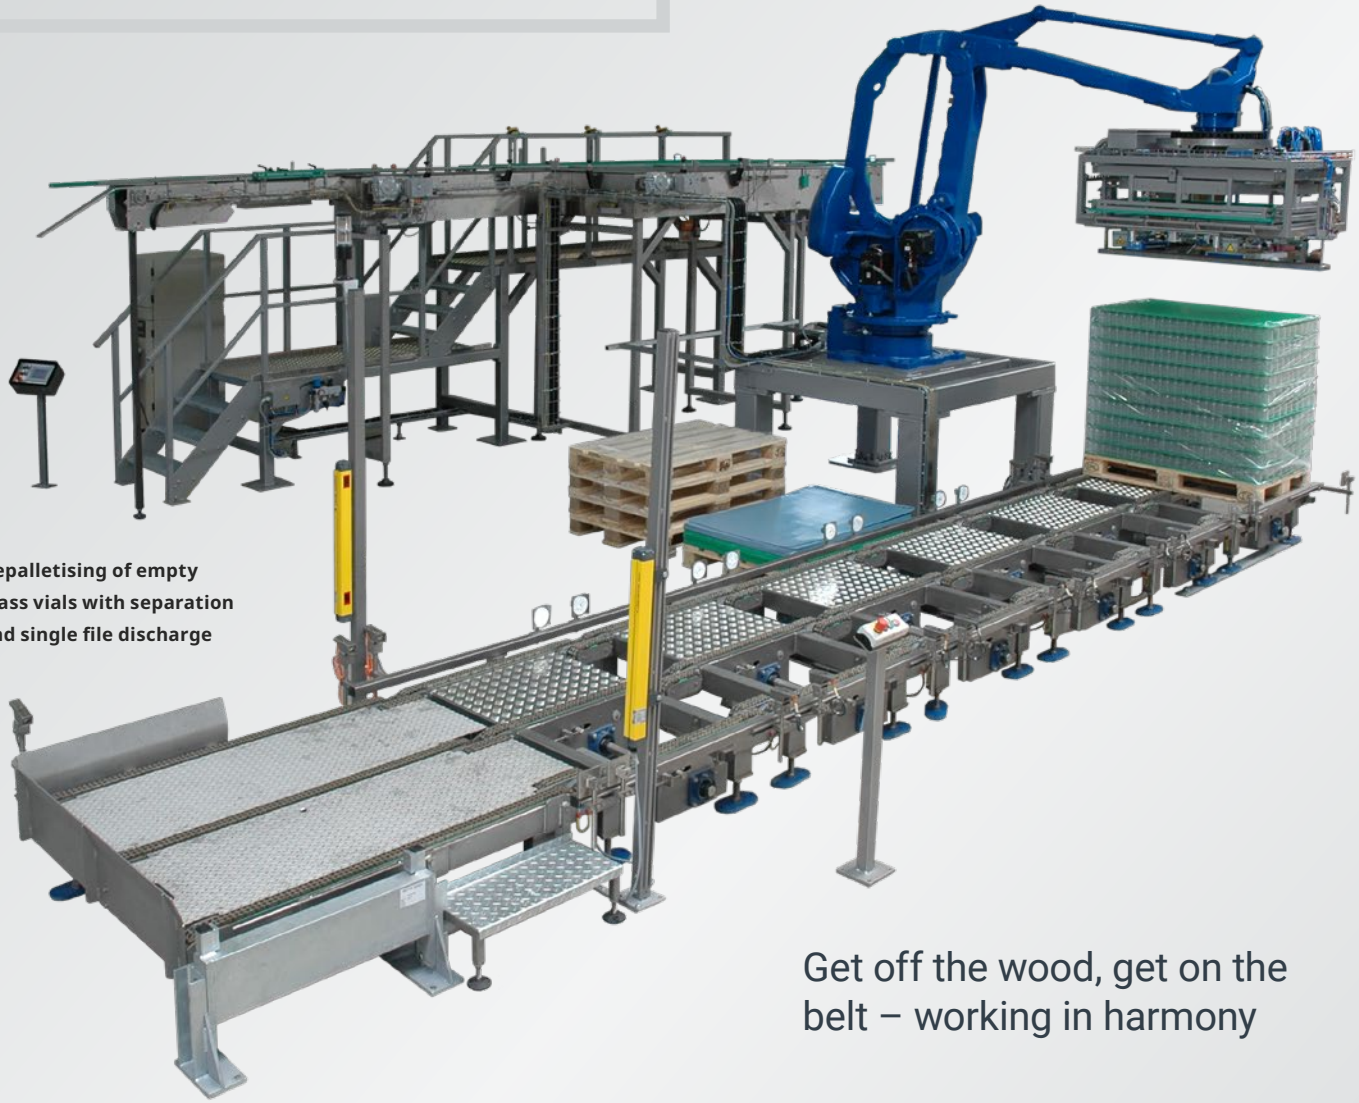
PRODUKTE

- Bottles
- Bags
- Boxes
- Cans
- Jars
- Cups
- Tubes

PACKAGING

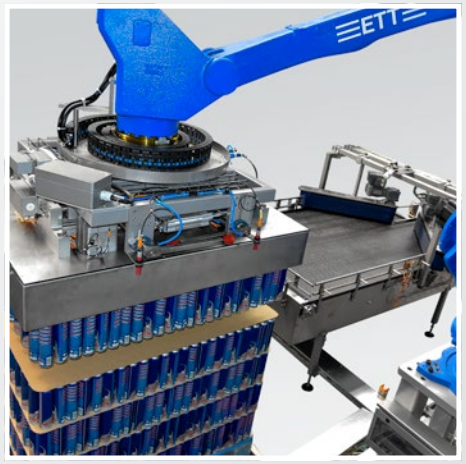
- Corrugated card-board trays
- Display packaging
- Wraparound cases
- Shelf-ready cases

DEPALLETISING



Depalletising of empty glass vials with separation and single file discharge

Get off the wood, get on the belt – working in harmony



Picking up empty cans from pallet stacks with cardboard slip sheets

Height scanning to pick up the plastic slip sheet and subsequent depalletising of the glass layer.

PACKAGING

(left to right as shown) Erecting of the case, collation of the products and insertion into the case, closing of the case.

Mechanical gripping for highest performance

Layer-wise insertion of bottles from a channel grouping into the case

Collating, packing, closing –
products of various shapes and sizes are packed into cases, fast and reliably.

PALLETISING

A job for high stackers – the finished packagings are prepared for transport in a space- and time-saving manner.

Standard palletising cell with empty pallet magazine (in the background) and full pallet discharge

Palletising of cases with fork grippers

Palletising of cases with clamping jaw gripper

With our wide product range, we do not only have a suitable solution for your packaging task, but we also offer you flexible concepts for smaller outputs or even high-performance systems for your fast-moving items. With us, you are always with the best on the market. Test us!
